Visit the [Taxand Global Website](#) [2]

Only Taxand Global brings you the collective experience and high-quality, tailored advice of more than 400 tax partners and 2,000 tax advisers in more than 40 countries.

International and independent.

After working in some of the largest professional services firms in the world, we have set out to deliver something different: advice that is strategic and practical, expert and responsive. Our integrated global coverage enables us to provide you with strategies that are proactive, practical and fully compliant.

A single point of contact, but many points of view.

Taxand affords you access to highly specialized expertise from all of the countries where you do business, coordinated personally through a single senior partner in your primary region. Our international team understands the finer points of tax and its broad implications on your business, including the risks associated with cross-border transactions. And, because we do not engage in audit activities anywhere in the world, you can rely on us for guidance that is both independent and timely.

Peace of mind.

The best tax advisers have a deep understanding of local and international tax issues, broad experience, and a profound commitment to optimizing your business. Rely on us to help you manage your tax burden while mitigating risk and avoiding costly surprises. Our knowledge and expertise provide the relief you seek when making complex tax decisions.
