

Utilities and Power

Published on Alvarez & Marsal (<https://www.alvarezandmarsal.com>)

Charged with producing safe, affordable power, in a market where any downtime is deemed unacceptable, deciding when to shut down old plants, and what fuel should power new ones, and addressing ever-changing cybersecurity threats — your environment is high-stakes, to say the least.

Let A&M help stack the deck in your favor and prepare you for the next challenge.

Utility and power companies call us when they need to:

- Analyze and support CapEx investments
- Understand and operationalize new regulation requirements
- Understand capacity implications for new technologies
- Manage IT security and compliance
- Evaluate their IT cost structure
- Implement smart-grid technology
